

## Photography & Video Guidelines

WSC follows the ASA Guidelines on the use of photographic/filming equipment at competitions and at club sessions.

For the avoidance of doubt, this applies to mobile phones with a camera/video capability, as well as cameras and video cams.

The key points from these guidelines for parents and members:

1. The use of photographic/filming equipment at galas is permitted provided the individual registers their intent with the promoter of the event and completes the appropriate logbook before using the equipment. At WSC galas the logbook will be made available by the person organising the event before the event starts
2. Parents are not permitted to use photographic/filming equipment at WSC training sessions
3. Video recording may be used during training sessions by coaches as an aid to teaching, unless a parent or guardian has elected not to permit such video recording
